

Head Greenkeeper's Report 14/02/19

Since the last meeting the weather has been changeable with snow and rain. The course is still holding up well.

Work carried out since last meeting;

11th and 12th tees were levelled and ready for turf. Turf to be delivered next week.

The 17th green drainage was completed.

The drainage on green side of 11th bridge was completed.

700 yards of drainage was added to the 10th and 13th holes. 3 channels on each hole. This was completed this week. We are already seeing a massive difference to these areas after the recent snow and rain.

All the hazard posts are being replaced.

Greens maintenance will be carried out in March weather dependant.

All general course maintenance has been carried out.

Alan Miller (Head Greenkeeper)
